And... Matching Closures

Screw Caps / Plugs / Fliptops / Disc / Double Wall Caps

Aluminium Caps

Shives / Wide Mouth Lids

Pharmaceutical Standard Caps / CRC Caps / Pilljar Caps / Desiccants / Dosers

Fastest growing PET family

We would like to thank you for taking the time to study our catalogue. We hope to be able to give you a clear overview of the incredible possibilities of our packaging solutions. This catalogue gives you an overview of our standard families of PET bottles and jars including matching closures. Our assortment of PET Packaging is the fastest growing in the industry and can be delivered from stock! Besides our standard packaging we are specialized in designing custom shapes using our 3D design capabilities. Enjoy our catalogue and feel free to contact us for more information.

Advantages of PET

The Food-, Personal Care-, Cosmetic-, Household Chemicals and Pharmaceutical market are rapidly discovering all the advantages that PET (Poly-Ethylene-Terephthalate) has to offer, making it the fastest growing packaging material in the industry.

- **1 Crystal Clear:** PET is one of the few plastics which can be crystal clear with a true sparkling effect giving it the same luxury appeal as glass (without the disadvantages of glass!).
- 2 Lightweight: PET packaging can be extremely lightweight, often less than 10% of the (original) weight of a similar packaging in glass. These savings in weight directly result in a substantial reduction of the transport costs as well as offering more convenience to the consumer.
- **3 Shatterproof:** Packaging produced from PET are virtually unbreakable, making it the preferred material for fillers and end-users and suitable to be used in all kind of environments like at home, on the shelves of the supermarket and at professional environments like hospitals, laboratories, offices etc.
- 4 Recyclable: PET can be perfectly recycled, even as far back as full loop cradle-to-cradle recycling. Used PET packaging is today more and more collected and re-worked back into granulate called rPET (recycle PET), which can be used for making perfect packaging again.
- **5 Barrier Properties:** Out of today's standard plastics for packaging PET is one of the best performing materials when looking at barrier properties and chemical resistant.

Pharma & Food Specialist (ISO 9001, 15378 & 15593)

It is our objective to meet, but even more so to surpass the requirements of our customers. Therefore we are ISO 9001:2008 certified by Lloyds to guarantee you the highest possible quality. For pharmaceutical packaging our factory is certified according to ISO standard 15378 (production of pharmaceutical packaging) and are we operating in our new clean room (Class D in operation) creating a clean environment for the production of your pharma packaging. Our pharma products are automatically packed into doublesealed PE brick-packs giving you the guarantee that they have not been touched by human hands. The products are not exposed to open air nor are they at any time in direct contact with cardboard.

For food packaging our factory is certified according to ISO standard 15593 (production of food packaging) and do we have all relevant migration tests done according to the new standard EC:10/2011.

Custom PET packaging

Besides our wide range of standard packaging of which we keep stock, we are even more so the specialist for developing your custom packaging. By using the most advanced 3D design software we analyze and design your newest shapes and with our 3D stereo lithographic printer we are able to present to you a 3D mock-up within 24 hours! All design data is digitally and interactively exchanged with our dedicated mould makers making sure no information gets lost. This way we can guarantee you very low mould costs and a short lead time giving you the best opportunity to distinguish yourself from the competition.

Missior

Your packaging, our mission! Packaging should not be your worry as we provide you with excellent quality, in time delivery and fair pricing, giving you the time to focus on your own mission!
